Friends! My sincere advice is to buy Now!

Nathaniel Spear

I'll tell you why you will *never* see such amazing values again

MY FRIENDS, I've been in this business nearly 40 years. I have seen periods of high prices and low prices. I remember the depression of 1893 when people thought good times would never come again. But they *came*, of course.

I recall the business slump of 1903 and the big harvest of the following year that brought recovery; then the money shortage of 1907; the slowing up of business in 1914 that was followed by great war time prosperity; and the depression of 1921-22, followed by the last big 7-year business boom and high prices—these are vivid in my memory.

Prices of all commodities are down when business is poor—but they always come back—*higher than ever*. That is the way it has always worked out and what has happened before will happen again.

Shrewd buyers buy when prices are low and when real bargains are to be had. Right now in this country the best business brains are *buying bargains; getting greater values; saving money*. And I say to you, my friends, in all sincerity that this is YOUR opportunity; that prices of household goods are low today—very low—and that in this new catalog of ours are values which I believe will never be duplicated again.

This new Book is full of Bargains—the Biggest Bargains in years. Think of saving \$25 to \$50 and even \$75 on Living Room Suites, Bedroom Suites, and Dining Room Suites. Imagine saving 25% to 40% on practically all household goods.

Because manufacturers are so eager to keep their plants operating and because the cost of materials has dropped so drastically, many prices in this book are nearly as low as the bare manufacturing costs.

And here is the best part of Spear Bargains . . . *you don't need Cash to take advantage of them*. Your CREDIT is always good with me. You can have anything in this book by making only a small down payment. I will give you a Whole Year to Pay.

My easy terms—the World's Lowest and Longest—permit you to buy, without sacrificing or stinting, when Bargains are biggest.

Look through this new Book *now*! Select the things that will make your home more beautiful, more comfortable. Use your CREDIT freely. Later when prices are high again, you'll thank me for advising you to buy now.

SPEAR Brings YOU AMERICA'S Biggest Bargains and Longest and Easiest Terms

FROM THE LITTLE ACORN grows the mighty Oak! And so, from a little 20-foot building in Pittsburgh, where Nathaniel Spear in 1893 founded Spear & Co., an immense institution now towers skyward. It is almost a city in itself, teeming with the ceaseless activity of more than a thousand workers. In addition to six large stores with a total floor space of over 450,000 square feet, there are acres upon acres of warehouse floor space that would take a whole day to cover.

The little store with only a few thousand dollars in resources and a little less than a thousand customers, is now a giant national concern with many millions of dollars in resources and more than a million satisfied customers all over America. But tremendous as it is, Spear & Co. is still just as human and neighborly and friendly as our first customers found it 38 years ago. In this book you will find letters from a few of our customers, praising the quality of Spear furniture, the fairness of Spear's Free Credit Policy.

In every state, town and village, you will find customers who praise our fair way of doing business, who testify to the high quality of our merchandise, who say our values are beyond compare.

Some of your friends and neighbors buy from Spear. Your Banker, Postmaster, Express Agent, Freight Agent—all know Spear quality and integrity. But our customers are our best references. Read their letters, all printed by their gracious permission!

Everyone, everywhere, can buy from Spear and obtain America's greatest bargains—on CREDIT—on 30 days' FREE HOME TRIAL. This is our Gold-Bond Guarantee, tried and true: *Satisfaction or Your Money Back.*

In Happy Homes All Over The Nation, Folks are Selecting Bargains And Making Out Their Orders For More Spear Furniture.

How To Order

We supply two order blanks with this catalog, next to the back cover. Please use the *Old-Customer* order blank yourself, and give the other to a friend. If you need additional order blanks, we will send you a new supply, or you may use plain paper. Read the order blank carefully before filling it out, and follow all directions. Write plainly and be sure to write your full name and address. Always include your middle name—for example: Mrs. Thomas James Davis or Mrs. Martha Alice Davis. If you do not live on a railroad line, state to what shipping point your goods are to be shipped.

Always specify the finish and color you desire, and where an article is made in more than one size, state the size desired. After you have made out the order, always check it back carefully, especially for size, color and finish.

Be sure to enclose a money order for first payment in same envelope with order. See Page 134 for easy credit terms.

No Hard And Fast Rules

If you wish to send more than the required monthly payment you may do so, thus paying your account sooner. Or if you want to purchase more goods while you are paying on another order, we will be glad to accommodate you.

If You Have No Freight Agent

We prefer to ship to the nearest station where there is a freight agent, in order to safeguard you. If this is impossible, we request that you send enough money, in addition to the first payment, to cover the freight. The railroads insist on prepayment of freight charges to stations where there are no agents. It is best, however, to ship goods to a station where there is a freight agent, if you can manage it.

How To Send Money

Make all payments by post-office money order or express money order if you possibly can. If that is impossible, use bank draft or cash. When sending cash always register your letter. Do not send personal checks or postage stamps if you can avoid it. Post-office money orders are the most satisfactory way to send money.

We Cannot Ship C. O. D.

Under no circumstances can we ship C.O.D. Ordering on 30 days Free Trial, backed by our Money-Back Bond, is much more satisfactory than C.O.D.

No Accounts Less Than \$5.00

We do not open accounts for less than \$5.00. Whenever you send an order which amounts to less than \$5.00, please send the full amount with your order.

You Can't Beat Our Prices

We absolutely guarantee that, quality for quality, our prices are the lowest! We have one price to all—the lowest possible! No matter where you live, you get the same low price—the same easy terms—the same guarantee, as if you bought at one of our stores. We guarantee that our prices are lower than the prices in any Cash or Credit store. Make your own comparison anywhere—quality for quality—value for value—service for service. Then you will buy from Spear.

Write These Banks About Spear

We refer you to the Manufacturers Trust Co., New York City; Farmers Deposit National Bank, Pittsburgh; Monongahela National Bank, Pittsburgh; and the Bank of Pittsburgh, National Association, founded in 1810 (with whom we have done business for over 30 years). The Dun Mercantile Agency, Bradstreet Mercantile Agency, American Railway Express Company, Pennsylvania Railroad, Baltimore & Ohio Railroad, and, in fact, any bank or mercantile agency in the United States will gladly vouch for Spear's integrity and responsibility.

SPEAR'S MONEY BACK BOND

I ABSOLUTELY GUARANTEE to you that every article in this catalog is exactly as it is pictured and described—that every article is strictly dependable. I have paid careful attention to the highest standards of quality. I guarantee further that my prices are always the lowest.

I GUARANTEE to you that every article in this catalog (except clothing) will be sent to you on 30 days' free trial—that you can use and test it in every way—that there is not the slightest risk or obligation to you in testing the quality of any Spear merchandise.

I GUARANTEE to you that at the end of 30 days' free trial, you may return any home furnishings which do not satisfy you completely. This guarantee applies even if you simply change your mind about wanting them. There are no strings to this offer.

I GUARANTEE to you that I will refund your first payment and freight charges both ways on any goods you do not wish to keep. The trial will not cost a penny. You order on trial and you test every article in your home. If you do not want it, send it back and your money is refunded.

I GUARANTEE to you finally that under my Long Time Dignified Credit plan all transactions between you and the House of Spear will be held in strictest confidence.

In short, I guarantee you merchandise of the highest quality at the lowest price, on easiest terms, with complete satisfaction to you or your money refunded.

Nathaniel Spear
President
SPEAR & COMPANY

Money-Back Bond—30 Days Trial

Above is shown our Money-Back Bond. All home furnishings are shipped on 30 days Free Trial. Use them as your own. If you are not satisfied in every way, return them within 30 days and we will refund your down payment and freight charges both ways.

We Do Not Pay Freight

When you order from Spear you know exactly what your goods cost you—Spear does not add the freight charges and extra profits to the prices of his goods. All goods are shipped charges collect and you pay the charges to the Railroad Company agent when the goods arrive. This is the fairest, squarest way of doing business. As a matter of fact the charges are very low, as you will see from the rates on Pages 131 and 132. Consult these pages also for parcel post rates. When goods are to be shipped parcel post, enclose with your order the amount necessary to pay the parcel post charges.

Examine Goods Carefully

Every shipment we make is turned over to the transportation company in first class condition. The railroad company is liable for any damage. It is best not to accept freight shipments until you examine the goods at your freight station. This does not mean that you must unpack everything. Just glance over the packages and crates to see that none are broken. If there is any damage, the freight agent is required to make a notation on the freight bill, which he gives you when you pay the charges, listing the extent of the damages. See that he does so and after the agent has made the notation on the bill, send it to us for adjustment.

We Always Ship Promptly

We are justly proud of our shipping service. Please remember, however, that goods shipped by freight come more slowly than by express. Always allow sufficient time for your goods to arrive, before writing us about non-delivery. We often ship goods to you direct from the factory to save you freight charges.

Write To Us Before Returning Goods

Our customers seldom return goods, but you are at liberty to do so; if you are not satisfied after 30 days trial. Never return goods before writing us. We will send you shipping instructions, tags and complete information, so we can identify your shipment when it reaches us, and credit your account promptly.

Correspondence

We are always glad to answer your questions. To save you time, however, we have explained practically everything right in this catalog. If the information you want is not given, write for it. We will answer your letters promptly.

When You Change Your Address

It is very important that you advise us promptly when you move, either from one street to another or from one town to another. Always be sure to give both the old and new address and your full name. We have 1,000,000 customers to serve, and it sometimes happens we have more than one customer by the same name. Please advise us promptly whenever you move. A postal card will do.

Our Dealings Confidential

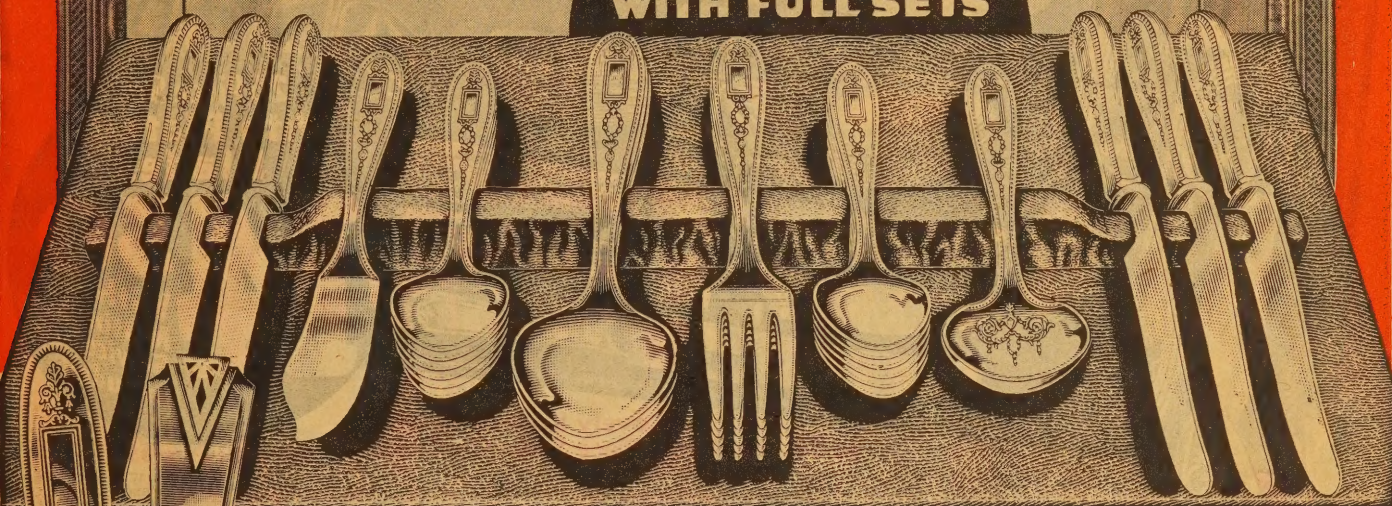

Many people prefer not to let others know about their private affairs. Your dealings with us are sacredly confidential. We ship all goods in plain packages and it is not necessary for your dealers or neighbors to know you buy from us.

Guaranteed For 35 Years

Silver Plate, in two of the loveliest patterns ever made by William Rogers & Son. This silver plate is guaranteed for 35 years, or as long as you may use it. Every piece is heavily plated with purest silver, with an extra deposit of silver on spots which receive the most wear. The "Princess" pattern is classically pure in line, truly aristocratic in appearance. Any woman can afford enough to outfit even a Princess! The rich Butler gray finish enhances the charming decoration. "Paris" is new, a design of slender proportions and graceful lines, with a delightful decoration and a beautiful Butler gray finish. This is the silver plate advertised in all the magazines. Our prices are the nationally advertised prices, set by William Rogers & Son. You pay nothing extra for the privilege of buying on credit. Buy your silver from us, on easy terms!

We Offer each pattern in three different sets—complete services for 6, 8 or 12 people. You may order any set in either "Princess" or "Paris" pattern, with: (1) modeled handle knives with plated blades; (2) modeled handle knives with De Luxe Stainless Steel blades; (3) hollow handle knives with De Luxe Stainless Steel blades. Modeled handles are the same in appearance, but smaller than hollow handles. De Luxe Stainless Steel blades have a keen cutting edge and a beautiful mirror-like finish that will never discolor. They make wonderful steak knives and are well worth the slight extra cost. Choose the set you prefer—then pay as you use it!

26-Piece Set is very popular. It consists of 6 dinner knives (modeled or hollow handles, plated or Stainless Steel blades), 6 forks, 6 tablespoons, 6 teaspoons, 1 butter knife and 1 sugar spoon. Set comes in new Nottingham service tray, illustrated above, with removable rack for silver. Tray has double glass bottom revealing a beautiful Nottingham lace dolly beneath the upper glass. Free with 26-piece set!

It includes 8 dinner knives, (hollow or modeled handles, plated or Stainless Steel blades), 8 forks, 8 tablespoons, 8 teaspoons, 1 butter knife and 1 sugar spoon. Set comes in lovely Beauty Box shown below. Box has a lace-like silver and green cover design. Inside the top is a plate glass mirror. The silver rests in a velvet lined rack. When rack is removed, the Beauty Box is ideal to hold feminine trinkets on the dressing table or in your suitcase.

No. H2342, 5-Piece Suite, Table and 4 Chairs, Dark Brown Oak With Gold Line Trim or Dark Gray With Blue Trim. Price..... **\$29.95**

Others Ask \$35.00

Think of it! Only \$19.95 for this charming 5-piece breakfast suite! At this price, it is cheaper to order this finished, decorated suite, than it would be to buy unpainted furniture and finish it yourself! You'll adore its colorful charm.

The sturdy, shapely drop leaf table and four graceful chairs are built of hardwood, finished with three coats of rich enamel. Please state finish desired: Ivory Enamel with Green decorations; Green Enamel with Orange trim; or Gray Enamel with Blue trim. Edges of the table and seats of the chairs are attractively striped in color. On the legs of all pieces a colorful band calls attention to the graceful turnings. Realistic floral sprays in natural colors decorate the top rails of the chairs and the drop leaves of the table.

Table and Four Chairs

With drop leaves extended, table top measures 36x42 inches—a roomy, practical size, entirely adequate for the average family. With leaves down, the top is 36x22 inches and the table requires very little floor or wall space, making it ideal for the modern small home or apartment. The chairs are ever so graceful and comfortable.

The Davenport Table

The illustration shows the pleasing contour and artistic appearance of the davenport table. But to realize the excellent workmanship and finish, you must see the table itself. It can be placed appropriately behind the davenport, against the wall or in the center of the room. Hundreds Of Inner Springs, Layers And Layers Of Felt!

No wonder this mattress is so divinely comfortable! For it is filled with hundreds of genuine Nachman spring units, enfolded in thick, soft layers of high grade white cotton felt. Nachman spring units, as you know, are small, highly flexible coils, individually interlocked in burlap. Each individual spring has full freedom of action, and can never work through or get out of place.

Conforms To The Body

Because this mattress conforms to every curve of the body, you simply sink into slumber. One sleeper never disturbs another by turning and tossing. The spring units, however, do not take the place of a bed spring. This mattress must be used with a regular spring. The spring units give extra resilience, super-softness and cloud-like buoyancy, absolutely unobtainable in an ordinary mattress.

Like A Bed Of Roses

Words cannot express the luxuriousness, the unbelievable softness and resilience of this mattress. You must order it on trial and see for yourself. Then you'll never give it up!

Each mattress is individually packed at the factory in a sanitary sealed carton.

The Famous "New ClaroPhonic" Tone Quality,
In A Magnificent Jacobean Period Console—
A Feature Bargain At This Low Price!
Full Size Floor Lamp And 5 Records Included.

Value Beyond Compare!

Golden, glorious, gladsome *Music* . . . all the famous "New ClaroPhonic" volume and tone quality, in this gorgeously beautiful Jacobean Period console . . . at just HALF what similar phonographs cost elsewhere. Try to equal it for \$100! And we include without extra charge this full size floor lamp and 10 selections (5 double face records)! Here's the ideal phonograph for every family.

Only \$49.95—Just \$4 Down!

Of course a Jacobean Period console, with its gorgeous turnings and lavish ornamentation, is costly to manufacture. But big sales—big-scale production—big manufacturing economies—enable us to cut the costs. That's why this "New ClaroPhonic" costs so little. Our price is only \$49.95, for this superb \$100 instrument with 5 double face records (10 selections) and a lovely floor lamp. Remember, too, that you send only \$4.00. That you use lamp, phonograph and records on trial for 30 days. Then, if you are delighted, pay \$4.75 monthly, starting 60 days after you send your order. World's easiest credit terms! We've never seen the equal of this console in an instrument under \$100. Cabinet is 32 inches wide, 20 inches deep and 33 1/4 inches high. Top and front are 5-ply Genuine Walnut or Mahogany veneers. The rest of the case is selected hardwood, finished Walnut or Mahogany. The finish is shaded and highlighted.

Richly Ornamented Cabinet

Observe the beauty of the stunning two-tone doors with carved ornaments in Colonnade design—the beveled top with beaded molding below it—the exquisite design of the bottom section, beautifully shaped and carved, with fan motifs and Colonnade molding decorations. Legs and stretchers are tastefully turned. The metal door pulls are Antique English finish. The grill front tone chamber occupies half of the cabinet. The other half is a roomy compartment for records or radio batteries. Double spring motor plays six 10-inch records (any disc record) on one winding. Needle trays and needles are included:

"ClaroPhonic" Tone Quality!

Richness of tone, to match the richness of the cabinet! The perfected "New ClaroPhonic" reproducer gives that full, rich, mellow, marvelously clear and distinct tone, characteristic of the best modern phonographs. A perfected tone arm and the new special motor, a tone chamber of woods especially selected for resonance—give you music as perfect as if you heard the artists in person. And—when you hear them on the "New ClaroPhonic" you can enjoy your favorite selection whenever you want it, as often as you want it. When you hear Galli-Curci's limpid soprano in the concert hall, think what it costs! And the concert is all too short. When you hear her on the "New ClaroPhonic" you can listen for hours. It's a wonderful thing to hear Sousa's band on the radio; but when you play "The Stars and Stripes Forever" on the "New ClaroPhonic," how much more satisfying it is! No static, no buzzing, no fading, no long winded announcements. Just a glorious flood of melody!

Full Size Floor Lamp

The floor lamp (no extra charge) is very attractive. The turned metal shaft in polychrome finish is decorated with a shapely ornament. Ornate metal polychrome base. You may choose between Rose or Blue for the big novelty shade of lustrous Rayon Seco, lined in Rose sateen. Shade trimmed with metallic braid and a French Spray of Rayon Taffeta flowers. Lamp stands 61 inches high and shade is 17x13 inches. Fitted complete with one socket, connecting cord and 2-piece plug—for electricity only, no bulbs included. Just picture this lovely lamp casting its soft, mellow glow over your new phonograph! A cozy "music corner" in your home!

The 1-inch center panels with steel cane inserts are richly decorated with a big floral medallion in natural colors. At either side there are 6-inch panels of handsome steel cane.

You may order this bed in single size, 3 ft. 3 in. wide, or double size, 4 ft. 6 in. wide. The headboard is 50 inches high and the footboard 34 inches, including casters. Furnished with side rails. A regular \$25.00 bed for only \$16.95. The enamel finish is triple-baked—it will not chip or peel. I want to tell you how pleased I am with Spear's service and especially your goods. About six years ago I bought a Gold Seal Congoleum Art Rug and it is good for 4 more years. Then I also bought a Bed, Spring and Mattress a short time after, and I am still using the best bed I've ever seen.

Sincerely yours,

Mrs. Woodson Swoops,

Genuine Value In A Serviceable Steel Bed Outfit

This Complete bed outfit is a typical example of the way Spear gives you a dollar's worth of value for every dollar expended. There are no fancy frills about this bed outfit. Rather, this well-built steel bed, comfortable mattress and sturdy spring have been built to give long service. This splendid bed outfit is very neat looking, attractive and easy to keep clean, and will add to the appearance of your room. Customers, everywhere, wonder how we can afford to offer an outfit like this at the extremely low price of only \$17.65. Quantity buying is the answer! Where smaller merchants contract for these outfits by the dozen, we are able to buy in the thousands and thus receive goodly price concessions. These savings we pass on to you. Send only \$1.00 with your order for this outfit.

The Bed is made of high grade, cold rolled steel, with continuous posts measuring 2 inches in diameter, and the filler rods measuring 3/4 inch. The headboard is 48 inches high. The bed is not elaborate but its every line bespeaks serviceability and neatness. It comes in your choice of two finishes: ivory or brown enamel finish, baked on at a high degree of heat. Both finishes are exceedingly attractive and are guaranteed not to chip, peel or crack. It is furnished in full size, only, 4 feet, 6 inches wide. This is our lowest priced bed outfit and we especially recommend it to those who must have a complete, inexpensive bed outfit. Shop around and see for yourself that an outfit like this would cost you from \$8 to \$10 more elsewhere.

The Mattress in this outfit is made with a number of layers of fluffy, sanitary felted cotton at the top and the balance of the mattress filling is of basswood excelsior. A mattress of this type is comfortable, holds its shape and will give satisfactory service for the money invested. The covering is a good grade of ticking in a neat stripe design. You will be pleased and agreeably surprised at our ability to furnish a mattress of this satisfactory type in a bed outfit at so low a price as \$17.65. Mattress weighs 45 pounds. The complete outfit is an unusual bargain.

The Spring is also staunchly built in one piece with the side rails attached. The corners of this resilient spring fit securely on to the corner posts of the bed. It is a firm, strong, rigid outfit. The spring fabric is made of double lock wire, thoroughly tempered, resilient, restful, noiseless and comfortable. At each end there are 29 powerful helical coil springs, which fasten the fabric to the angle ends of the spring. Fabric and ends have rust-proof galvanized finish. This outfit does not have separate rails. Instead, they are attached right to the spring, a very convenient, satisfactory and improved method of construction.

Has Your old bed, with its worn-out spring and mattress just about reached the point where you're ready to discard it? Probably the only reason you're hesitating is that you're not willing to spend a lot of money for a new outfit. Well, here's the answer to your problem! A steel bed, spring and mattress for only \$17.65! A comfortable, neat looking, attractive bed outfit at a saving of at least 33 1/3%! Spruce up the room where you spend your sleeping hours with a new, fresh bed outfit! It's bargains like this that make the name "Spear" famous all over the country.

Easy Terms: Send only \$1.00. Then, two months from date of order, start paying only \$2.25 monthly. If not satisfied, return it, and we will refund your first payment and freight charges both ways. Excellent Coil Spring And Comfortable 45-Lb. Felt Plaited Mattress. Order On 30 Days' Trial.

Only \$2 Down, \$3.00 Monthly—60 Days After Order

A Big Bargain. A \$45.00 outfit for only \$28.45. The newest panel design bed, with graceful 2-inch Georgian posts, a wonderfully fine coil spring, and a 45-lb. comfortable felt plaited mattress. All for \$28.45. A value unparalleled in our entire experience. Sold to us by a big maker at but little above cost. Prices reduced to a new low level.

Sleep Soundly. This bed outfit commands your attention not only because of the low price, but also because it is an outfit designed for sound, restful, refreshing sleep. Besides, it is one that you will be exceedingly glad and proud to have in your home.

Beautiful Design. Graceful in design—light in weight, strongly constructed, smooth, highly glossed finish. It is the genuine Georgian tubing, a new graceful shape, but recently placed on the market, which commands everyone's admiration. Note the illustration, see how this tubing is shaped and beveled—it has taken the country by storm! In this massive bed the posts measure 2 inches in diameter—ordinarily at this price you can secure only 1¼ or 1½-inch posts. The steel cane panel is 8 inches wide, and is attractively set off with an embossed metal decoration. Round fillers each measure ¾ inch in diameter. Made of cold rolled steel, electrically welded together, designed for lifetime service.

Richly Finished. Your choice of 3 finishes—creamy ivory enamel, brown enamel, or richly grained American walnut. These finishes are baked on at a high degree of heat, are as smooth as glass, and guaranteed not to chip, flake, or peel. A full size bed, for two people, 4 ft. 6 in. wide. The head board measures 50 inches; the foot board 35 inches high, including the easy rolling casters. Light in weight, easy to handle. Its appearance will delight you. Its value will amaze you.

The Spring is made with 90 resilient spiral coils of genuine Premier wire, highly tempered. Frame of spring is reinforced with heavy steel bands. The deep resilient coils are tied, top and bottom, with a network of steel wires. This construction keeps the coils in position and insures a better wearing, more durable spring. Bottom rails are of angle steel and spring has brown enamel finish, giving it a most attractive appearance.

The Mattress is constructed of selected felt and cotton. Will retain its comfortable softness for years. Has a springy, cushion-like body. Center is of carefully selected cotton and the top, bottom, and ends are several layers of felt. Not only a comfortable mattress, but also a very durable one. Deep and evenly tufted which prevents it from becoming lumpy or thin in spots. Roll edge is shape retaining. Convenient hand loops make it easy to handle. Covered in a very attractive and durable grade of floral art ticking. Mattress weighs 45 lbs. and is exceptionally comfortable.

The Price. Don't judge the quality of this outfit by its low price. We contracted for many hundreds at a big price concession. You reap the benefit. Easy terms! Send only \$2 with order, \$3.00 monthly, starting 60 days after you send your order. Enjoy sleeping on a spring that adjusts itself to every curve of the body on a good, well-made, felt plaited mattress, with a first-class, handsome bed. Only when you know what a difference in sleeping comfort a good outfit like this makes, can you realize what a wonderful investment it is. The bed can be purchased separately, in any finish, with side rails. Order today on the world's easiest terms.

30 Nights' Trial. We are so certain it will please you thoroughly that we will gladly send it to you on approval. Try it 30 nights at our risk. Nachman Spring Units
Inside—Heaviest, Imported,

Outside. Comfort Through
And Through! Real Value!

Supreme Comfort. Spring-filled mattresses have been used for years in fine hotels, in ships' staterooms and wealthy homes. Only recently, however, has quantity production brought the price down to a point where the average home can afford such a luxurious necessity. We offer this one at the record-shattering price of \$23.95. Send only \$2, pay no more for two months, then start the easy payments—only \$2.75 monthly—a small sum to pay for assurance of restful sleep!

New Medallion Covering. The outer covering of this mattress is heaviest quality imported sateen, firmly and closely woven, with a lustrous finish. It is in beautiful medallion pattern—like an imported tapestry. Blue, Gold and Taupe predominate in the design. Around the sides of the mattress there is a fancy figured border of equally heavy, lustrous, imported sateen. Genuine Nachman spring units—row after row, individually interlocked in burlap—make this mattress supremely comfortable. They are small, highly flexible coils and hundreds of them are used, overlaid with deep layers of good grade felted cotton. This mattress will never lose its comfortable resilience nor its splendid appearance. Its beauty is a delight to the eye—its downy ease is a greater delight to the weary sleeper. A perfect mattress, inside and out!

Trim And Tailored, this mattress has a roll edge and convenient side handles to aid you in turning it. Screen ventilators on each side admit currents of fresh air so your mattress is always pure and clean, perfectly ventilated. Several layers of felt are placed over the spring units, top and bottom. Most mattresses do not have these extra layers. Compare this mattress feature for feature, coil for coil, covering to covering, with any other at the same price. You will find that nobody else begins to offer equal value! Order on trial. Rushed to fit any full or single size bed (4 ft. 6 in. or 3 ft. 3 in. wide). And Covered With A Most
Attractive Art Ticking. Extra
Comfortable And Serviceable!

**Lighter In Weight, But Thicker,
Softer, and More Comfortable
Than Most Felt Mattresses!**

Kapok is a silky, fluffy, sanitary filling of much slicker texture than cotton, and unusually light, elastic and comfortable. This is an excellent quality mattress with a degree of resilience which is truly remarkable. The filling is the best Java Kapok quality, subjected to a sterilizing and refining process. The mattress is lighter in weight, yet thicker, softer and more comfortable than most felt mattresses. You will be amazed by its restful resilience.

Fancy Ticking. The covering is an excellent grade of heavy art ticking in a beautiful floral pattern, blue and pink predominating. It will wear exceptionally well. Kapok mattresses never get hard or uncomfortable, and an airing in the bright sunshine will revive the filling and bring the mattress back to its original shape and softness. This mattress is made with high roll edge and cloth handles for ease in turning. An extra row of stitching prevents it from sagging or losing its shape. It is shipped to you fresh from the factory, spotlessly clean and new. This mattress comes in full size, 4 ft. 6 in. wide, or single size, 3 ft. 3 in. wide. For either wood or metal beds it combines thickness with light weight as only a Kapok mattress can do—full size weighs 39 pounds; single size 22 pounds—yet they are thicker than most 50-pound felt mattresses. A Mattress Value That Can't Be Beat! Excellent Quality.

How It Is Made. This mattress is made from only the cleanest and best raw materials obtainable. In the process of felting, the maze of filmy webbing is handled by highly specialized machinery and skilled operators in such a manner as to keep it absolutely uncontaminated by dust and germs, and to obtain a positive uniformity of thickness. The great care with which the successive layers of felt are piled, and then pressed together, accounts for the fact that these mattresses never get hard or lumpy. But if you want an inner spring mattress, the most luxurious of all, see those on Pages 42, 46, 52 and 54!

A Night's Rest on this pure felt mattress will refresh you—renew your energy. It is so soft and downy with its many layers of felting, it is so sanitary due to the process of its construction, that you'll be thankful every minute that you ordered it. It's a real bargain sensation that can't be equalled!

"Talisman" Snowy White Ware

You won't need a bowl of roses for a center-piece when you set your table with these beautiful dishes—for they are lavishly decorated with sprays which reproduce the color of Talisman roses. While this dinette suite is not as fine as our higher priced 9 and 10-piece dining suites of Genuine Walnut, it is none the less altogether charming and practical for the average small home. The six-piece suite is ideal for the small family and includes four chairs, all with slip seats, covered in tapestry of neat design; a buffet in 42-inch size, enhanced by lovely French Gold shaded decorations; and a sturdily built extension table, with a perfected locking device. The eight-piece suite, which is identical to the six-piece suite, except that it has six chairs instead of four, is extremely practical for larger families. All pieces are sturdily built of hardwood, finished Brown American Walnut. This dinette suite is indeed a happy medium between informal, colorful breakfast suites, and the formal larger dining suites. Magnificent larger dining suites of Genuine Walnut are shown on pages 68 and 69.

A Stunning Big Buffet Of Striking Beauty. Built Of Quarter-Sawed And Solid Oak In Rich Golden Finish.

True Beauty characterizes this fine buffet. The curving grace of the mirror—the shaped bottom rail—the beveled top of 5-ply genuine Quarter-Sawed Oak—the richly carved motifs on the doors—the antique brass finish hardware—all these will delight you. Since beauty without quality is worthless, we have insisted upon superb quality and finest construction throughout. This buffet is built of Quarter-Sawed and Plain Solid Oak in rich Glossed Golden finish. All stock is specially selected and thoroughly seasoned. The top of the base is made of 5-ply Genuine Quartered Oak, with edges beautifully beveled. End panels, drawer bottoms and back are 3-ply construction. The graceful mirror of clear French plate glass measures 42x8 inches. The buffet, of course, is a big, impressive size, 48 inches wide overall and 20 inches deep from front to back.

Storage Space is essential in the well kept dining room, and this buffet gives you a world of cupboard and drawer space. There is a large linen drawer at the bottom, with two smaller drawers above. The top drawers are lined for silver, with rich green velvet. In addition there are two roomy cupboard compartments, measuring 17x13 inches, with doors decorated by stunning carvings. With all this drawer and cupboard space you will never be at a loss for convenient, dust-proof places to keep all your table linens, to say nothing of the protection the silver drawer will give your silver—the velvet lining protecting it from mars and scratches. Every housewife will appreciate the utility of this big buffet.

You Save \$17.50! In every respect, this buffet is a regular \$45 value. No doubt you wonder how we can sell it to you for \$27.45. The answer is simple enough—quantity purchasing! If we bought only 100 or 200 buffets, as small merchants do, we too would have to pay the manufacturer a higher price and, of course, charge you more. But we buy thousands. Manufacturers compete for our business. When they sell us a big order, it means they can sell cheaper—the old story of quantity production. Manufacturing for less, they sell to us for less. Buying for less, we sell to you for less. So here you are—a beautiful Oak buffet of unusual design and finish, for \$27.45. You save \$17.50! Easy credit, too!

A Well Made, Colonial Style Buffet, Priced Very Low. Has Solid Oak Top, 40x21 Inches. Large Roomy Drawers. Highly Glossed Golden Finish. A Regular \$35.00 Buffet For Only \$19.85.

Ordinarily a buffet of this style and quality would sell for \$32.50 to \$35 in any store. We buy them at a very small margin above the actual cost of production. Then by cutting our profit to the bone we are able to sell them way under the market price! For an inexpensive buffet, this is exceedingly well made. In fact, the construction is far superior to that of the ordinary buffet at this price. Made of selected solid oak, finished highly glossed Golden Oak, which looks well in any room, no matter what the color scheme. It makes a lovely background for a dainty buffet scarf and a few choice pieces of china or silver.

The Colonial design is carried out in Colonial scroll posts, scroll mirror standards, large wooden knobs, and top drawers extending out beyond the base. The 3-ply ends and 5-ply doors are your guarantee of sturdiness. The two top drawers are fitted with locks and keys and one of them is felt lined to protect your silverware from mars and scratches. The top measures 40x21 inches—a very desirable size, and the high grade French plate mirror is 30x8 inches. Until you place it in your own dining room, you have no idea the difference in convenience and beauty this handsome buffet will make. It adds considerably to the charm of the room.

Roomy Linen Drawer at the bottom, and the double door storage compartment will appeal to the housewife. They bring order into the dining room, give you a place for everything and everything in its place. We want the privilege of shipping this buffet to you on 30 days' Free Trial. Pay only \$1.00 down. True "Claro-Phonic" Tone Quality In A Very Charming New Console Table Cabinet. Choice of Genuine Walnut or Mahogany.

All The Grace which characterized the reign of King Louis the XV, is repeated in this "Claro-Phonic" console table. In those days they had no phonographs to thrill them with delightful music. Today, even the poorest of us is much more fortunate than those kings and queens. We copy the graceful cabinets they used for whatnots; and from what looks merely like a handsome cabinet, now pours forth the living, thrilling, cascading beauty of golden voice or instrument. Has the famous "Claro-Phonic" tone arm and reproducer, which give a full, rich, mellow, marvelously clear and distinct tone.

Your Choice of Walnut or Mahogany! Top and doors are 5-ply genuine Mahogany or Walnut Veneers. The balance of the case is hardwood, 3-ply construction, richly finished. Note the curved front legs, scalloped bottom rail, paneled doors with filigree metal door pulls, the elaborate grill front of the tone chamber, the fluted front posts with gilded French ornaments. A beautiful cabinet, 38 inches high, 19 1/4 inches wide and 20 inches deep.

Order on Trial. The perfected noiseless motor plays any disc record made—three to four 10-inch records on one winding. Record compartment has large shelf. We include needle trays and a generous supply of needles—also 5 double face records (10 selections) without extra charge. Order this captivating console table, on trial. A \$60 value! Only \$3 down, \$3.75 monthly. Shipped from Indiana factory; shipping weight, 90 lbs.

Graceful And Fashionable—Strong And Durable. Genuine Finetex Woven Fibre Suite In The Stunning Cafe-Au-Lait Finish. Colorful Cretonne Coverings And Graceful Blue Diamond Decorations.

For Fashion, for charm, for service—this is the suite chosen by clever women who want something above the average. Finetex woven fibre furniture is finer in weave than the ordinary fibre furniture. The surface is smoother and takes a better finish. It costs a little more, but its superiority in every way compensates you a thousand times over for the small additional outlay required to own it. This suite will bring a truly indescribable color and charm into your home. It is suitable for any room—living room, sun parlor or porch. The graceful lines, the unusual decorations, the colorful cushions, possess an air of real distinction. Best of all, this is a suite which will stand up under hard usage and give splendid service for years.

Special Attention is given to the construction of this suite. A few of the details will give you some idea of its superb quality. The frames are made of the very best seasoned ash. All cushions are of the automobile type and are removable. Each cushion is made with nine deep, resilient coil springs, supported by steel bands. This means nine springs in chair and rocker, and 27 in the davenport, making a strong, buoyant seat construction which will give you the utmost in comfort. Careful execution in all details of manufacture assures a suite that will not only retain its splendid appearance, but one that will stand up under constant service almost indefinitely.

Easy to Handle. Furniture of this character lightens the house-keeper's burden considerably. It is light in weight, and easy to handle, and the cushions can be removed to dust and clean. Fibre furniture is being used more and more for the living room in all of the better homes. It has a distinctive charm that will endear itself to you more and more as time passes.

The Davenport really furnishes the background for the entire suite. This one is 60 inches long (between the arms); over all it measures 73 inches. The seat is 21 inches deep and the back is 19 inches high from the seat. These proportions assure you the maximum of comfort. It is a most attractive piece of furniture. Note the pleasing effect the handsomely shaped front apron and cleverly braided edges create. The back is decorated with three diamonds stenciled in blue, and the semi-roll arms add a very pleasing touch. There is an attractive diamond shape decoration stenciled in blue on the front of apron also. The three removable cretonne covered cushions are built to last and retain their shape. Shipping weight of davenport, securely packed, about 65 pounds.

The Chair and Rocker are identical in size and construction. Each has the auto type removable spring cushion. The height of back and size of seats are ideal for comfort. The under construction is of ash and is very strong and rigid. The seat is 19 inches wide and 19 inches deep. The back is 20 inches high above the seat. Over all these two charming pieces measure 30 inches wide and like the davenport have semi-roll arms, shaped front apron, braided edges and diamond shaped decorations. Shipping weight of each, about 30 pounds.

The Covering. The beauty of this suite is further enhanced by the attractive, serviceable cretonne covering—a rich harmoniously blended floral pattern, with rose, taupe and blue colors predominating on a black background. These colors contrast beautifully with the cafe-au-lait finish of the fibre, giving any room a cheery atmosphere.

The Table is made over a well braced frame of ash. The legs are closely wound with fibre and the table is rigidly reinforced by two stretchers. The round fibre top measures 25 inches in diameter, and the table stands 28 inches in height. It is decorated to match the chair, rocker and davenport and can be bought separately. It is just as carefully constructed as the other pieces. Shipping weight, 35 pounds.

Real Quality predominates in this suite, but we have kept the price \$90.00, but our enormous buying power and small margin of profit assure you a saving of fully \$30.00. We have impressed upon the manufacturer that in this furniture only the very best of materials must be used, and you will find it one of the best investments you have ever made.

Order The Suite complete or any pieces you desire. It will be to your advantage, however, to buy it complete—chair, rocker and davenport. We make a reduction on the suite complete—about \$4.00 less than the price of the pieces individually. At the end of 30 days, if you are not completely satisfied, you may return the suite and your first payment and all freight charges will be returned to you. All pieces shipped from Pittsburgh; safe delivery guaranteed.

The seat cushion, which measures 72 inches long and 23 inches deep, has a high grade all cotton filling with button tufting to hold it in place. There is a deep flounce at the front. Every Piece Is Well Made Of High Grade Materials, And Will Give Exceptionally Good Service.

The Design Is Most Attractive. Well Upholstered Backs, Shaped Top And Bottom Rails, Sturdy Posts, Comfortably Upholstered, Non-Sag Seats.

A Fine Design. What a wonderful difference this suite will make in the appearance of your home! It is a very artistic design and all pieces are massive in construction. The finish is excellent and the backs and seats are comfortably and attractively upholstered in brown Spanish artificial leather. Here is a suite that will make your living room more inviting, more pleasant, and a cozier room for family and friends. You will take great pride in the splendid design.

The Complete Suite is much more desirable than similar suites on the market because it contains three big chairs and rockers—the average suite contains only two, with two smaller pieces. This large arm chair, and the two arm rockers are very comfortable and desirable, and will furnish your living room most attractively. In addition to these three pieces, the suite includes a library table, taboret and waste basket. The table serves a double purpose, that is, library table and desk. All pieces are made of solid oak, air seasoned and kiln dried, finished in your choice of highly glossed golden or brown fumed oak. Oak is a hard, close grained wood, will not warp or swell and will stand the hardest kind of everyday use. This suite is top notch in every respect.

The Table is very gracefully designed and most complete. Measures 24x36 inches, has roomy magazine and book racks at either end and most important of all, the writing desk drawer, which is an exclusive Spear feature. This drawer, when pulled out, can be used as a writing desk. It has an ink well receptacle, ink well, pen and pencil grooves. The lid is removable; writing supplies can be kept in the drawer.

Two Striking Improvements—The Scalloped Canopy Effect Top Rail And The Full Width Roll Shutter Front—Yet Our Price Is Even Lower Than Others Ask For Cabinets Without These Features.

Full Width Roll Shutter Front

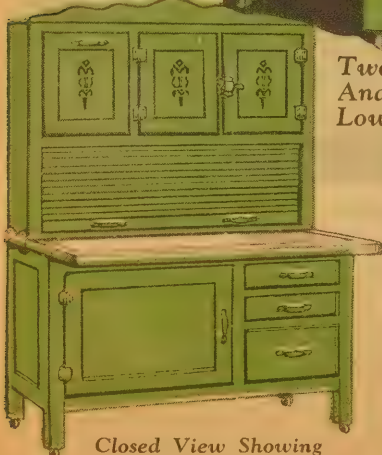

This is a feature usually found only in higher priced cabinets. See how it looks, in the small illustration at the left. There are no lower doors to swing out over the working top and get in your way. The full width shutter front rolls up or down at a touch, to hide or reveal the roomy shelf and sugar bowl behind it. This feature alone adds several dollars to the cost of the cabinet. But we bought an enormous quantity and obtained a big cut in price. Take advantage of it!

The tilting metal flour bin is 32-lb. capacity, with sifter attachment at the bottom. In the upper double door compartment, there is a sturdy shelf. Behind the roll shutter front the glass sugar bowl rests in a convenient rack. The sliding working top, finished in white porcelain enamel, is hard as flint, smooth as glass and easy to clean. There are two metal lined drawers for cutlery and dish towels. Below them is the bread and cake drawer, also metal lined. The roomy utensil compartment in the base is fitted with a sliding wire pan shelf (just pull it out to reach pans at the back) and there is a wire pan rack on the door. Ever so convenient!

A Bargain We Recommend

We wish you could see this cabinet in colors—Golden Oak, White Enamel, Gray Enamel or lovely Jade Green Enamel. And you can see it! Just order it on trial (only \$2 down). Observe its beauty, its sturdiness, its convenience. If you are not more than pleased, return it at our expense within 30 days. If you keep it, don't pay another penny until two months from the date you sent your order; then send only \$2.75 monthly. Enjoy the convenience of this lovely cabinet, which simplifies your work! Don't overlook the other more complete models on pages 104 and 105—but if you want a low priced cabinet this is the biggest bargain ever. Shipped from Indiana factory; shipping weight, 120 lbs. You never saw an oil range so beautiful—Spring Green enamel, set off by satin black enamel and shiny white porcelain trim. Finest quality porcelain enamel in rich Springtime Green is used for back and side splashers, oven door, and burner drums. This genuine porcelain enamel will wear marvelously, is easily cleaned and kept clean. Simply wipe it with a damp cloth, like a china dish. The legs, front guard and top rail are finished in green japan baked-on. The oven door handle and flame control handles are glistening white porcelain. The other parts are satin black baked-on enamel. A beautiful color combination in a beautiful oil range! Order on 30 days free home trial. Satisfaction guaranteed!

Economy Features. The big economy features are the patented heat collector and the big double duty burners. The flame from the burner heats the front cooking hole, while a patented heat collector carries surplus heat, usually wasted, back to the rear cooking hole where it does effective auxiliary heating. Thus you get double value from every drop of fuel. The "Oil Queen" burns kerosene (coal oil) the cheapest fuel, obtainable anywhere. The large burners have asbestos lighting rings or "kindlers" instead of cotton wicks. The automatic wickless burner flame is easily regulated by turning the control handle. There is nothing to get out of order. Inner and outer combustion tubes are made of special heat-resisting metal and with proper care will give service indefinitely. Burner is easy to light, easy to regulate, simple to operate and perfectly safe. Two big burners in the cooking top, each with the patented heat collector, make a four-hole cooking top, besides the two oven burners.

Large—Sturdy. The cooking top is made of heavy cold rolled channel steel, the same type as used in gas ranges. Front of cooking top is equipped with two individual, heavy steel key plates, removable for easy cleaning. The patented heat collector gives double cooking capacity per burner. The cooking top is 34 inches from floor and range is large size, 53½ in. wide and 20½ in. deep. Grates are heavy cast iron. All grates are built so that heat, passing through the patented heat collector, is evenly distributed under your cooking utensils. In addition, the front grates are reversible so all the heat from the burner may be concentrated on the front cooking hole, if desired. The large-necked glass oil tank is 4-quart capacity, easily refilled. It maintains an accurate, visible oil level and locks securely in place. The wide shelf above the cooking top provides ample space for keeping foods and dishes warm. The entire range is built of the heaviest and strongest materials obtainable.

Big Built-In Oven. Extra large and completely lined—meets every baking requirement. It is stationary—cold air cannot circulate around or in back of it, to retard baking. It is extra large—inside measurements, 18½ inches deep, 16 inches wide and 14 inches high. The oven is heated by two full size burners and the circulation of heat has been so carefully worked out that the oven heats quickly and baking time is shortened. Accurate thermometer on the oven door makes it possible for you to gauge the heat and bake with unfailing success. This big oven is fully lined with heavy steel (not merely skeleton lined). Two wire oven racks can be adjusted to any height, permitting use of various sized utensils and enabling you to secure the proper baking levels. Until you have used a range with built-in oven you have no idea the difference it makes in baking results! Far superior to oil ranges with movable ovens. Big juicy roasts—flaky pastries—are easy to prepare with the efficient "Oil Queen."

30 Days Trial! Never before has an oil range of this size and quality been obtainable at a price so low. Only \$36.95 for a fine range in green enamel, with stationary, built-in oven! Don't fail to order on our new history-making terms. Remember—you send only \$3.00 down! Long After The Payments Are Made And Price Is Forgotten, You Will Still Be Using This Big "DeLuxe" Enameled Oil Range.

"DeLuxe"—Our Finest Oil Range—Superbly Efficient! Large Size And Cooking Capacity! We Could Give You No Better Quality If We Doubled The Price!

Perfected Burners. The invention of this burner is the greatest forward step ever made in the manufacture of oil ranges. Already 60,000 ranges with these new burners are in operation and the manufacturer has not yet received one complaint! This long chimney burner is made of non-rusting brass. It lights like a lamp—just touch a match to the wick in several places. Action is instantaneous. Burner begins to heat the cooking utensil the minute it is lighted. It burns with a clean, steady, blue flame, just like gas. It is economical in oil consumption and provides a maximum amount of heat, without smoke or odor. You can instantly regulate it from a simmering fire to the highest frying flame.

Double Duty. Another feature makes this range doubly efficient. It has a double row of cooking holes—two burners, heating four cooking holes. As shown in the small illustration at the bottom of the page, the burner heats the hole directly above it; surplus heat, which is usually wasted, is carried back to the rear hole and used again. You have four cooking holes—two right over the flame; and two at the back, providing auxiliary heat for slow cooking. The other two burners distribute heat evenly under the oven. All of the big, powerful burners have highest quality, heavy, woven cotton wicks, the most satisfactory on the market.

Large Oven. Women used to say it was impossible to bake bread in an oil range. That was when oil ranges had flimsy, movable ovens. You ought to see the bread that is baked in this extra large, heavy, stationary oven! Heated by two full size burners, it is built-in, so no draft can circulate around it to hamper its baking efficiency. It is completely lined with heavy steel—not merely skeleton lined. The two wire oven racks are adjustable to various heights, so you may use any size baking dish or pan and place it at the correct baking level. Oven door is fitted with an accurate thermometer. The inside measurements of this large oven are 18½x16x14 inches. It's big enough to roast a turkey!

Now! The De Luxe WIZARD

\$94⁷⁵ WITH LUSTROUS PORCELAIN TUB

ON CREDIT

"De Luxe" in name . . . De Luxe in action! All the superior features that made the "Wizard" washer famous . . . and in addition, a lustrous porcelain enamel tub in beautiful Apple Green finish both inside and out; as well as several conveniences not found in any other washer under \$135! Yet our price for the "De Luxe Wizard" Electric is only \$94.75. Send \$5 with your order, pay nothing more for two months from the date you mailed your order, then send \$5 monthly.

It's A Perfect Beauty!

No lovelier washer was ever made. Observe its clean, sweeping lines, with all the mechanism safely concealed. The big, deep tub is made of Armco steel drawn in one piece—no seams or welds—heavily coated with highest grade enamel both inside and out. Enamel is a rich Apple Green flecked with white, contrasting effectively with the green lacquer finish of the other parts and the nickel plated trim. Around the top of the tub is a special nickel plated ring with a rubber cushion between the ring and the rim. The recessed cover rests on this ring. A perfected 5-point mounting supports the tub at center and outer edges with a continuous spring ring which takes up any vibration. This construction costs us more money, but it is the best method yet devised to prevent chipping or cracking of the enamel. Washer is mounted on easy rolling casters and can be moved about with ease. The "De Luxe Wizard" has compensating features ordinarily found only in \$135 washers. Every part which is subject to wear may be adjusted to counteract the result of this wear. This protection means it will not be necessary to replace bearings and other parts.

Made By 1900 Corporation

Like the "Wizard" electric this new "De Luxe Wizard" is made exclusively for Spear and Co. by one of the foremost manufacturers in the industry. We guarantee this washer for 10 years, and so do they. By contracting for thousands of these washers we obtained them far below the usual cost. The "De Luxe Wizard" has all the features which exacting buyers demand—beauty, safety and efficiency without a peer. It will wear a lifetime. It is large capacity—washes 8 lbs. dry weight—6 to 8 sheets or their equivalent—in 3 to 6 minutes, without rubbing, without boiling. Aside from its being super-efficient, the "De Luxe" is the most beautiful washer on the market.

Absolute Safety

There is a double meaning to the safety of the "De Luxe Wizard." It is safe for you and your children, because all working parts are enclosed and there are no projections, no sharp edges or dangerous metal corners. It is safe for finest fabrics as well. The perfected 3-vane agitator sends the hot soapy suds surging through and through the wash, whether it consists of filmy silks, heavy blankets, or oil-soaked working clothes. Although it is extra large capacity, the "De Luxe Wizard" is built so compactly that it requires floor space only 24 inches square.

Mechanically Perfect

Best Heat Treated Steel is used exclusively for worm, gears, shafts, etc. Timken Bearings absorb weights and thrusts. Direct Drive—no belts to rot, slip or break. Automatic Lubrication requires no attention—when motor is in operation the automatic oil system continuously bathes all operating parts in oil. 1/4-H. P. Electric Motor—finest nationally advertised make—is completely enclosed. Sediment Zone is a chamber at bottom of tub where the dirt settles as it is washed out. Thus your clothes are always being washed in clean water. Powerful 3-Vane Agitator sends hot soapy suds surging through and through a tubful of clothes—washes quickly and thoroughly, and will not injure the finest fabrics. We guarantee the "De Luxe Wizard" washer for 10 years, against defects in material and workmanship.

Reversible Safety Wringer

The wringer is steel, cadmium plated, with a beautiful silvery finish. It is reversible and locks into any one of 7 positions. The 12-inch rubber rolls will not break buttons. The instant safety release eliminates any danger. You can wring by electricity by electricity, or you can operate the wringer by itself.

30 DAYS FREE TRIAL

Ideal In Every Way

The Wizard washer is wider in diameter at the bottom than at the top so that it stands secure and steady, and incidentally, has graceful sweeping lines. It is 23 1/2 inches wide at bottom of base, 21 1/2 inches at top. The machine is 46 1/2 inches high overall (to top of wringer) and it is just 36 inches to the top of the tub—an ideal height. The "De Luxe Wizard" is compact—takes up little room, but it is highly efficient and will wash the family laundry like magic. For beauty it is unsurpassed; really the illustration does not do it justice. So order on trial—see for yourself!

Put It To The Test

Send only \$5 with your order. Do your washing for 4 weeks this new, easy way. Washes clothes quicker and cleaner without tiring you out. **Made And Guaranteed
By The 1900 Corporation.**

The "Wizard" Electric is made exclusively for Spear and Co. by one of the pioneers in the washer industry, an old reliable company without a peer. We guarantee this washer for 10 years and they stand back of us 100%. We graded every machine for beauty, durability, ease of operation, washing capacity, electric power, speed and safety. The "Wizard" surpassed all the others in every test.

To prove this, we actually bought 10 well known machines. Not one of them cost less than \$125—many cost more. We lined up these 10 beside the "Wizard." We graded every machine for beauty, durability, ease of operation, washing capacity, electric power, speed and safety. The "Wizard" surpassed all the others in every test.

Not content with this, we invited two women to test all 11 machines. One was a Domestic Science expert; the other a housewife. They tested every machine with family washings and pronounced the "Wizard" not only the best of all, but the most satisfactory washer they had ever used!

**Now We Want You To
Test It For 30 Days!**

Send only \$5.00. Use the "Wizard" on 30 days Free Home Trial. Wash your flimsy silks, sheer hosiery, daughter's gingham frocks, the boy's play-stained overalls, your husband's oil-soaked work clothes. Wash those heavy wool blankets, quilts, rag rugs, slip covers, dust mops, everything you could not wash by hand or with your old machine. Prove that the "Wizard" washes 8 lbs. of clothes, in 3 weight (6 to 8 sheets or their equivalent), in 3 to 6 minutes, without rubbing, without boiling. Then make your decision. Our "Wizard" Electric is not only the most efficient washer on the market. . . it is also the most beautiful. It is built on streamlines, like a high powered racing car. All working parts are enclosed—for safety as well as beauty. The heavy, tempered copper tub, with corrugated sides, polished and lacquered, shines like molten gold. Rich green lacquer finish on all other metal parts forms a gorgeous contrast. Even the wringer is finished green. Although strong and substantial, built to withstand years of hardest usage—although it is of extra large capacity, the "Wizard" is not an awkward cumbersome machine. It occupies space only 24 inches square. And this washer is so beautiful that you will not mind giving it a corner in your kitchen or hall, if you have no laundry room. It is mounted on easy rolling casters and even a small or delicate woman can move it about with ease.

**Safety For Fine Fabrics—
Safety For You As Well!**

More important than beauty, more important than speed, or strength, or size, SAFETY was our first consideration. Safety for you, safety for your children, safety for your clothing. All working parts are enclosed for safety. There are no projections, no sharp edges, no dangerous metal corners.

Reversible, Safety Wringer.

The all-metal wringer is reversible, and it locks in any one of 7 convenient positions. The 12-inch rolls of pure rubber will not break buttons. You can wring by electricity while washing another tubful. This wringer has positive, instant, safety release. One touch on the lever and all pressure is instantly removed from the roll. One of the country's foremost manufacturers co-operated with us to cut manufacturing costs and give you the finest steel refrigerator on the market for the money! And here it is... a beauty... we are proud to offer it to our million satisfied customers. The outside case is made of heavy rust-resisting steel, beautifully enameled in white, or jade green and old ivory. Solid brass, heavily nickeled—shining like silver—is used for the hinges and the new "roller latch" door fasteners. These rustproof latches are automatic in operation and *need not* be set for closing. A gentle slam closes the door and it stays tightly closed, keeping warm air out and cold air in the refrigerator. The legs are high—refrigerator clears the floor by 8 inches, making it easy to clean beneath it and remove the drip pan. The interior lining is snowy white enamel applied over galvanized iron; so well made, that it is practically like a 1-piece porcelain lining. All the joints are double seamed. It's easy to clean this snowy white enamel. The shelves are made of strong steel rods, welded to a steel bar frame and heavily tinned. The trap and drain pipe are the latest and best design, remarkably easy to keep in a sanitary condition. Insulite, the newest, high grade insulating material, is used throughout to insure economical ice consumption. An extra thick layer of Insulite—then a wide area of still air space—then sheathing board—form the efficient insulating walls of this refrigerator. You will be amazed at the saving on ice which this splendid insulation makes possible. We furnish this refrigerator in three sizes as described in the table of prices below. We urge you to choose a refrigerator plenty large enough for your needs, as the larger sizes consume less ice in proportion to keep food fresh and pure. Select the size you need and order today! Perfectly Insulated And Strongly Built, "Iceberg" Refrigerators Save Ice! Golden Oak With White Enamel Lining. Four Sizes.

New low prices on a new refrigerator with all the up-to-date scientific improvements! Thoroughly insulated to save ice and preserve food perfectly! Four popular sizes—each refrigerator made of selected Ash lumber, paneled on front and ends, finished rich Golden Oak, with two coats of high grade varnish. The solid brass trimmings, nickel plated, have a high luster and will not rust. The interior is sanitary, easy-to-clean white enamel, baked on over galvanized steel at a high degree of heat. The two largest sizes can be furnished with a convenient water cooler tank, if desired. Our prices are the lowest possible for refrigerators of such high quality and superior insulation. You may order on easiest terms; the saving you make on ice will practically pay for your refrigerator!

Properly Insulated

Constructed with proper insulation, this refrigerator is naturally a splendid preserver of food and ice. Insulating walls include the outside cabinet of selected ash lumber, nearly one inch thick; water-proof, asphalt-coated sheathing; still air space; another layer of sheathing; complete wood lining $\frac{3}{4}$ -inch thick; galvanized steel and, finally, the white enamel interior lining. This wall of insulation keeps cold air in the refrigerator and warm air out. Inside, the air flues are carefully designed to get just the right circulation of air currents to maintain dry air and the correct low temperature, for proper refrigeration. The enameled, galvanized steel lining is made with lock seams in the corners, so it is practically a one-piece lining. The extra strong, removable ice rack of heavy galvanized iron, electrically welded, sets high enough to give good circulation of air. Enamel lining is easy to clean.

Other Features

The ice chamber is designed to take standard ice cakes without tipping. Efficient, automatic latches of solid brass, nickel plated, hold the doors shut airtight. These are the new "roller" type latches, requiring only a gentle slam of the door to lock tight. A self type trap with rubber gasket is easily removed for cleaning. The sanitary bar shelves are electrically welded and heavily tinned. Largest size has four shelves; the next two sizes have three, and the smallest refrigerator, No. H 3192, has two shelves in the food compartment. The substantial legs are fitted with easy rolling casters. Not a single feature has been overlooked to make this a handsome, efficient refrigerator. We urge you to order a size large enough for the needs of your family, because a large refrigerator consumes less ice in proportion and is, therefore, more economical than a smaller model. Overcrowding the food chamber wastes ice.

Water Cooler

The two larger sizes are furnished either with or without a sanitary, non-rusting water tank, which keeps drinking water cool and insures purity and freshness. The water cooler is a blue enamel, porcelain-lined metal tank in the ice chamber, connected by rust-proof pipe to a nickel faucet on the front of the case. Imagine how pleasant it is, especially on a hot summer day, to have this ever-ready supply of delicious cool water on tap! It's much better for your health than water with ice right in it, because it is pure and just cool enough.

Order On Trial!

Use this refrigerator for 30 days. If you are not delighted, return it and we will refund your payment and freight charges both ways. If you keep it, start monthly payments two months from the date you mailed your order. Our terms on the largest size, No. H 3195 (without water cooler) are only \$3 down—pay no more for two months—then send just \$3.25 monthly. At these low prices, on these easy terms, every family can afford a fine new refrigerator. Shipped from Michigan factory. Order a size large enough for your requirements!

Shown At Left—A Low Priced Refrigerator—Five Sizes

Many people prefer a refrigerator with the ice door on top, as pictured at the left. Here's a splendid value in a good looking, well made, efficient refrigerator of that type. It is offered in five practical sizes. Order the one you want on trial and test this refrigerator for yourself. It is constructed of selected Ash lumber, nearly one inch thick, paneled on the front and ends and finished Golden Oak, with two coats of high grade varnish. The inside lining is 30-gauge galvanized steel, heavily coated with sanitary white enamel in the provision chamber, and double seamed, so that it is practically a one-piece lining. It is easy to clean—a snowy white chamber for perfect preservation of food. As white and cold as its namesake—an Iceberg!

The insulation includes the thick outside cabinet of paneled Ash lumber; water-proof sheathing; still air space; another layer of sheathing; a complete $\frac{3}{4}$ -inch wood lining, and finally the galvanized steel and white enamel interior lining. Refrigerator has an efficient trap, easily removed for cleaning; sanitary bar shelves, heavily tinned; sturdy ice rack, nickel plated hinges of solid brass, and new style "roller" latches which hold the doors shut airtight. Our prices save you 30% or more and we give you easiest credit. We urge you to order a size plenty large enough for your needs, because overcrowding the food chamber wastes ice. Shipped from Michigan factory on 30 days Free Home Trial. If you are not pleased in every way, return it within 30 days and we will refund your first payment, and freight charges both ways. A trial costs you nothing!

Walnut Or Mahogany Enamel

This beautiful heater has an outer cabinet of true grain Walnut or Mahogany porcelain enamel, to match the finest furniture. The glossy enamel requires no polishing; just wipe with a damp cloth. The back is uniform blue steel. The mica panel in the fire door cozily reveals the leaping, glowing flames within.

Amazing New Features Save Fuel

One of the big features of Spear's Heat Master, as shown in the illustration to the right, is the machine ground ashpit, ash-door and draft slide, fitting tightly and insuring perfect draft control. The largest size, No. H 2600, also has the perfected, new furnace check draft in the smoke pipe, with a chain regulator permitting any adjustment, as shown in the small illustration. The Heat Master burns 25% less fuel than ordinary heaters! You can bank it at night like a furnace and in the morning have an inviting, glowing fire. It holds fire 24 hours or more.

Steady Circulation Of Warm Air

You can see the beauty of this heater; like fine furniture! But you can't see its scientific construction whereby the largest size, H2600, heats 3 to 4 rooms by constant circulation of warm, moist air. It takes the place of 2 or more old style heaters, saves on fuel and attention. It burns hard or soft coal, wood or coke. We recommend the largest size as the most economical in fuel consumption.

Big Cast Iron Heating Unit

The large heating dome is all cast iron, molded in one piece, forever preventing cracking or smoking. The outer cabinet is heavy gauge steel with Armco enameling iron. Removable duplex grates can be shaken from the outside, without opening doors. Big feed door and ash door for your convenience. We include a large ashpan, cast iron elbow and shaker. It burns hard or soft coal, wood or coke.

The COLUMBIA ALL ENAMEL

With Cast Iron Top Front and Base

Our finest circulating heater... and that means the best on the market! It is bigger and heavier than ordinary heaters—more ornately decorated—much more efficient. Yet our price for the largest size is only \$69.95. Easiest terms!

Walnut Or Mahogany

The imposing big outer cabinet is heavily enameled in rich Walnut or Mahogany to match fine furniture. This smooth, glossy enamel finishes the entire cabinet except the back, which is uniform blue steel. Sides are made of Armco rust-resisting iron, while the top, front and base are all cast iron, extra strong and heavy to give lifetime service. Steel cane ornaments the front and the ash door is at the side, in order not to mar the appearance of the front—a very unusual feature, typical of expensive heaters.

Circulates Warm, Moist Air All Through The House!

The "Columbia" replaces several ordinary heaters—the larger size heats 4 to 5 rooms—and saves 25% on your fuel bill, besides. The operating principle is the same as that of all circulating heaters, but the "Columbia" has additional features which assure 25% more heat. Cold air enters at the bottom, passes upward between the outer cabinet and the inner heating unit of cast iron, being warmed on the way, then passes out the grill top into the room and all over the house. Ordinary heaters have only "3-way" circulation of air, but in the "Columbia" all four sides between the inner and outer cabinets are free for circulation of air. It is more expensive to build a heater this way, but it is worth the extra cost because it saves so much on fuel bills. The entire inner unit is of cast iron. It pays to buy a heater with all cast iron inner heating unit and cast iron top, front and base, because such a heater is heavier, gives more heat per unit of fuel, holds the heat longer and gives service for a lifetime.

Supersize, With Extra Large Fire Pot

The "Columbia" does not come in small sizes with 14 and 16-inch fire pots. It is furnished only with 18 or 20-inch fire pot. All dimensions are given in the table of prices below. The supersize "Columbia," No. H2617, has an extra heavy 20-inch fire pot. It is much heavier and larger, of course, than the 18-inch size and radiates much more heat, which accounts for the difference in price between the two sizes. It heats so many more cubic feet of air and saves so much more on coal bills, that it is well worth the difference. With every heater we include a humidifier, cast iron elbow and large bailed steel ashpan. Just keep the humidifier filled with water. The control drafts are the latest word in scientific fire control. You can bank it at night like a furnace and in the morning have a glowing fire. Heat regulation during the day is easy, almost instantaneous. The "Columbia" burns any fuel—soft coal, hard coal, wood or coke. It has extra heavy duplex grates of the most improved construction. We cannot praise this heater too highly. Order it on trial! Shipped direct from Illinois foundry.

"Happy Hour" Vacuum Washer Cleans Without Pounding Or Rubbing.

The Vacuum

principle of the "Happy Hour" Vacuum Washer makes it supremely efficient. It cleans clothes not by pounding or rubbing, but by sending the air and hot soapy suds through the clothes again and again. The vacuum cups move up and down and also around in a forward oscillating motion, creating a suction which literally sucks dirt out of the clothes, without in the least damaging the finest fabrics.

Easy Running.

A tub full of clothes makes the "Happy Hour" run only 5 per cent heavier than when empty. Its patented ingenious trouble-proof construction and mechanism makes it operate without effort. Handle connects with the meshed gears and fly-wheel. These in turn operate the dolly shaft to which the vacuum cups are attached. This makes the smooth cups move up and down and around in a forward oscillating motion.

Features:

Vacuum cups and dolly shaft suspended from lid and lift out with it. No other gears are cut and repressed by milling, insuring easier operation. Fly-wheel moving at high speed makes machine run faster, easier and better. Tub is everlasting Louisiana cypress; corrugated inside. Exterior finished with several coats of waterproof varnish. Holds six sheets or equivalent. Diameter at top, inside, 21 inches, height 30 inches. Metal parts are rust-proof, electro-galvanized finish. Interlocked cross-braces reinforce the construction. Information About Freight Rates

Because of the very small percentage of profit we make, it is impossible for us to pay the freight. Our customers always pay the freight charges when they receive the goods, but if there is no freight agent at your station, it will be absolutely necessary to send enough money with your order to prepay the charges. Always make a liberal allowance for these charges, and if there is any balance after we pay the freight, we will return it to you, or credit your account.

Pittsburgh Centrally Located. We desire to call your particular attention to our advantageous location for shipping. Pittsburgh, by reason of its ideal railroad connections, is more centrally located than any similar city in the United States. Shipments from Pittsburgh reach their destination on through trains with the least possible delay. Pittsburgh handles an enormous freight tonnage annually.

Freight Classification. We always pack and ship our goods so as to secure the lowest possible freight rates. Railroads charge for freight according to classification, and the classification of the article changes in different sections of the country.

Eastern Classification. If you live in any of the following states use the column marked "East" in "Table A" on Page 132: Connecticut, Delaware, District of Columbia, Indiana, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia.

Western Classification. If you live in any of the following states use the column marked "West" in "Table A" on Page 132: Arizona, Arkansas, California, Colorado, Idaho, Illinois, Iowa, Kansas, Louisiana, Minnesota, Missouri, Montana, Nebraska, Nevada, New Mexico, N. Dakota, Oklahoma, Oregon, S. Dakota, Texas, Utah, Washington, Wisconsin, Wyoming.

Southern Classification. If you live in any of the following states, use the column marked "South" in "Table A" on Page 132: Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee.

How To Figure Freight. Three essential points to be remembered in figuring freight charges: Weight of Article ordered; Classification of

All goods are packed and shipped so as to secure the lowest possible freight rate. Your local dealer will sell you goods delivered to your home free of transportation charges, but always remember that his lines are limited, and that he always pays freight when buying his goods, the same as you do, and naturally has to include these charges in figuring his selling price. Even after you pay freight charges, we guarantee you will save 25 to 40 per cent when buying from us.

Article ordered; Freight Rate per 100 pounds, to point of destination on Article ordered.

See Tables A and B. By referring to "Table A" on Page 132 you will find the "class" of the article you desire, then turning to "Table B" you will find the rate per 100 lbs. to your town, or the town nearest you. Then multiply the rate by the weight of the article which is given in the Catalog description and you can estimate the charges within a few cents.

An Example. We will say you live in Columbus, Ohio, and you desire to purchase a writing desk, shipping weight 100 lbs. By referring to "Table A" you will note that desks take a 1½ class rate in Ohio, which is in the Eastern classification.

Then look at "Table B"—look for Ohio—find Columbus. The first-class rate to Columbus is 72 cents per 100 lbs. But the actual rate is 1½, therefore 72 cents multiplied by 1½ is \$1.08 which is the cost of shipping the desk to Columbus, Ohio. The rates quoted are those in effect January 1st, 1931.

Freight Charges Are Low. Do not worry about the freight charges. Remember we guarantee to save you money even after you have paid freight charges. Whether you buy your goods in your home town or have them shipped from Pittsburgh or our factories, you always pay the freight charges, as the small dealer has to include these charges in his selling price.

It is not necessary to write us for freight rates, as the following table gives these rates to different points in the United States. If your town is not given in the table, take the town nearest to it. The rate per 100 lbs. is almost the same.

Terms on Clothing and Shoes

Monthly payments start two months from date you order.

Orders for Shoes and Clothing

If you order clothing or shoes—no home furnishings—add up your order as listed on the other side, and see the Table of Terms on Home Furnishings, at the right. Suppose your home furnishings order comes to \$44.95. You send no money with your order, pay nothing for two months, then send only \$4.25 monthly, as shown in the table of terms. Your payments start two months from the date you mail us your order—no sooner.

Orders for Home Furnishings Only

Customers use this order blank, give the other to a friend! order blank in this catalog is for new customers. Old customers may buy up to \$20 for only \$1 down. The other order, you are not entitled to these old customers terms. (If this is your first order, you are not entitled to these old customers terms.)

COMBINED ORDERS—

Home Furnishings and Clothing

But suppose you send a COMBINED order: for instance, \$44.95 worth of home furnishings AND \$34.95 worth of shoes and clothing—a total of \$79.90. Since your combined order amounts to more than \$75, you must send \$4.25 with order. Now let's figure your monthly payments. On the \$44.95 furniture order you pay \$4.25 monthly, as shown at the right. On the \$34.95 clothing order, you pay \$4.25 monthly, as shown at the left; so \$4.25 plus \$4.25—you send a total of \$8.50 monthly. If your entire order is \$75 or less, but if the total of all the goods you order (home furnishings, clothing and shoes) is over \$75 you must send the first payment as shown in the table of terms.

A New Kind of Service

Keep your cash—use your credit. Buy home furnishings and clothing on Spear's FREE, easy, confidential, long-time Credit Terms. Your credit is good with Spear. Send only the nothing more for two months—then start easy monthly payments. We ship home furnishings on free trial. If you are not satisfied, return them within 30 days and we will refund your down payment and freight charges both ways.

Orders for Home Furnishings Only

If you order home furnishings only—furniture, rugs, curtains, dishes, stoves, etc. (no shoes or clothing), add up your order as listed on the other side, and see the Table of Terms on Home Furnishings, at the right. Suppose your home furnishing order comes to \$44.95. You send only \$4 with order, pay nothing more for two months, then send only \$4.25 monthly, as shown in the table of terms. Your payments start two months from the date you mail us your order.

All Orders Which Include Shoes and Clothing

The table of terms at the left shows the payments on any order which includes clothing or shoes. That is, if you order any home furnishings (rugs, stoves, furniture, curtains, dishes, etc., in addition to clothing), you must add up the total of all your purchases. Then consult the table of terms at the left. It shows how much you send with order, and the monthly payments. Monthly payments start two months from the date you mail your order. For example, suppose you order a shirt at \$4.98, a ladies' jersey knit coat at \$6.48, a coat bedspread at \$7.95, and an inner spring mattress at \$15.95. Your purchases will amount to \$35.36. Consult the table of terms at the left—it shows you send just \$3 with your order and pay only \$4.75 monthly, starting two months from the date you mail us your order.
